

THE AI INNOVATOR

Concept-to-Market Challenge

Date: 14 April 2026

Format: Individual or Team of 2

Tools: Your brain, Google, pen and paper,
any software you already know

TM

TURKMENISTAN

LEMON

KOALA

CHESS

MAGNET

Your challenge: Starting from five random creative parameters, execute a full concept-to-market pipeline. Each step builds on the output of the previous one. You will move from a short story to a research question, a validated problem, a designed solution, a working prototype, a landing page, and a pitch deck. Work through every step yourself. Estimate how long the entire exercise would take you, then write that estimate at the top of your submission.

a

Short Story

Write a single-paragraph story that weaves together all five parameters above. The story should be vivid, specific, and set in Turkmenistan.

CREATIVE WRITING

b

Research Question

Transform your story into a genuine research question suitable for a Masters dissertation. It must be specific, researchable, and grounded in a real academic domain.

RESEARCH

c

Problem Statement

Research and diagnose a real problem or opportunity inspired by your question. Write a clear problem statement that identifies a narrow customer or user segment in any sector.

RESEARCH

d

Solution Design

Design a solution: a physical product, a service, or a hybrid. Define who the provider is (startup, government agency, corporation, NGO, etc.) and describe the offering in detail.

DESIGN

e

Prototype + Design Specs

Create a prototype with design specifications: features, architecture, user flows, brand guidelines, and an MVP development timeline.

BUILD**f**

Landing Page

Design and build a professional landing page for your solution. It should include real imagery, a clear value proposition, pricing, and a call to action. Deliver as a working HTML file.

BUILD**g**

Business Plan + Investor Pitch Deck

Write a business plan and marketing campaign. Create a visually striking slide deck (10 slides) pitched to YCombinator, TechStars, Dogpatch Labs, and BlackRock Capital. Slides should use bold statements, large numbers, photos, and data visualisations. Minimise text; maximise visual impact. When relevant, add progressive reveal of key elements within slides. Final slide: 6 or 7 bullet points on lessons learned.

BUSINESS**h**

Publish Online

Create the project folder at ~/ai-innovator/projects/[ProjectName]/ (create directories if needed). Save each step as a separate file (01-story.md, 02-research-question.md, 03-problem-statement.md, 04-solution-design.md, 05-prototype.md, index.html, pitch.html, 07-business-plan.md) so the full innovation trail is preserved. Publish to a live URL (GitHub Pages, Netlify, or similar). Share the link.
